It is not known when the different gloves described in the publications listed on the attached PT-SB08B were first available to the public. Some of these products may have been available before the filing date of Applicant's provisional patent application.

The website of the Grandoe Glove Company, a print out of one page of which is enclosed, also describes in portions of the website that cannot be printed, the ski glove shown thereon as having the following innovations (among others): (1) an adjustable strap with extra long hook and loop construction which enables the skier to tighten down the wrist area to ensure a custom fit, resulting in a warmer, more comfortable glove; and (2) FUNCTIONAL CURVE™, a proprietary super curved ergonomic design that is said to increase comfort while reducing hand fatigue by 35%. Applicant believes that these gloves were available in stores on or before December, 2002.

In addition, Applicant believes that he read an article, before December, 2002, and possibly before the filing date of Applicant's provisional patent application, that indicated a golf company, perhaps NIKE Golf, was working on developing a golf glove with pre-curved fingers.
